# Who we are

X3 Solutions is a creative, service-focused audio-visual company specialising in the production of live events.

We help you create memorable event experiences for your audience, taking your brief and providing audio-visual equipment that is suitable to your specific needs and requirements.

We work closely with businesses in many industries, including the Pharmaceutical, Cosmetic, Automotive and Financial sectors, as well as being a preferred supplier to Events and Creative Agencies.

Our highly skilled team has extensive knowledge and experience in the AV industry.

# What we do

## Display Solutions

Our state-of-the-art laser projection systems are a staple offering for conference setups. We can marry these with large format display screens for relay purposes, ensuring the delegate experience is considered throughout the event space. With a modern approach to digital signage, we offer a sustainable approach to branding around your venue. If a more dynamic approach is required for your display system, we can support your event with an ultra-wide projection system and modular high-brightness LED walls for both indoor and outdoor environments.

## Audio Solutions.

Audio is a staple at any event, and we ensure we source the best brands and engineers to deliver a seamless audio experience. Our basic PA packages ensure the most modest of events maintain a high standard throughout. Our project managers will work with your event managers to ensure we have adequate microphones for presenters and any audio response requirements you may have. If you're hosting a celebration, we can provide DJ equipment along with a higher output PA system to create the right atmosphere.

## Scenic Solutions

X3 provides tailored backdrop solutions. We work with you to create a branded space in which presenters and your brand are at the forefront. Our stock panels offer a quick and budget-focused approach. These can be enhanced with lighting or printed branding. For a bespoke approach, we will take a detailed brief and turn this into a CAD design with 3D renders of the final solution for client sign-off.

## Lighting & Rigging Solutions

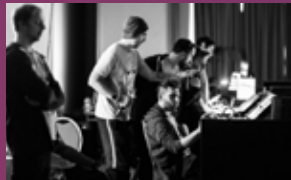

Our lighting solutions offer clients a varied setup, from wireless signage uplighters to an intelligent moving effect and LED ambient system; X3 has the correct solution for your event. We utilise systems that can be client/venue operated for a more streamlined approach. These can be scaled up and an engineer can design, programme and operate a fully curated show. With LED colour change lights, wireless battery, venue or ground lights for architectural improvements, we will find the right solution for you.

Our lighting team is supported by qualified riggers. This means we can manage: design, safety assessments, and installations for your event, which can be scaled from a few small lighting stands to a more elaborate truss system hung from your venue's ceiling.

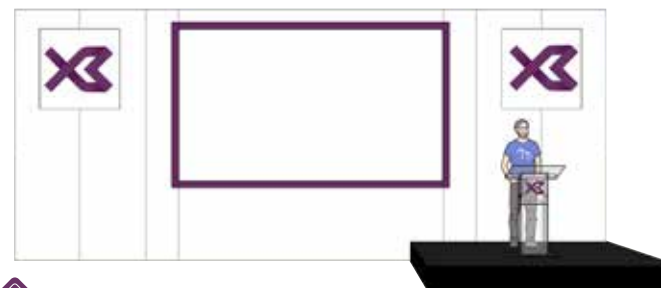

## Hybrid Solutions

X3 uses various solutions to ensure our events can engage a wider audience, whether it be simple slide and audio capture, or broadcast solutions that can be streamed via your bespoke event platform, or a simple Zoom meeting. Our camera systems can be integrated into broadcast software solutions seamlessly, ensuring the highest standard for your audience. X3 can also create scaled studio environments for fully virtual events, using our creative services to engage your audience.

## Creative Solutions

Our services extend beyond equipment provision. We support our clients globally by designing event layouts and equipment specifications. Our CAD designers will create detailed floor plans and 3D visuals to ensure all elements of your events are considered. This flows seamlessly into a detailed quotation for our clients to review, or for our global partners to support our clients with a local provision. It's a cost-effective local solution but designed, managed and delivered by your X3 project manager, ensuring continuity from inception.

## Bronze package

This specification is suitable for an audience of between 30-50pax. This can be tailored to your specific needs.

## Silver package

This specification is suitable for an audience of between 50-100pax. This can be tailored to your specific needs.

### Enhancements

# Enhancement Solutions

Looking to amp up the event experience? Our options below have got you covered!

With choices ranging from enhanced stage presence to vibrant LED walls and top-notch LED lighting solutions, X3 has everything you need to take your event experience to the next level.

### Scenic Enhancements

At the forefront of your presentation area, the lectern has various functions. The digital signage lectern can display simple PowerPoint slides for presenter names, or play animated videos for holding graphics, offering limitless possibilities.

### Display Enhancements

Some events call for a more vibrant display solution. If your environment has a lot of ambient light, LED technology with its high brightness output can help to overcome these challenges. This is a modular solution, which means we can create large or small format options depending on your requirements.

### Lighting Enhancements

We host events at some of the most prestigious venues around the world. Enhance the delegate experience with a lighting package that makes the most of those gorgeous architectural details. We use LED technology that can change the colour and feel of your venue at the click of a button.
